

STEP 1:

Go to Azure DevOps
Login using microsoft account

STEP 2:

Create a new project

Project Name: ExpenseMonitoringSystem

Click Create

STEP 3:

Create a pipeline
Pipelines -> Create Pipeline

STEP 4:

Select the source
Example:
Choose github
Authorize access

STEP 5:

Select repository: expense-monitoring-system

STEP 6:

Choose the azure pipelines YAML file

Select: azure-pipelines.yml

Click Continue

STEP 7:

Click: Run Pipeline

Azure DevOps will now:

- create VM
- install Python
- install libraries
- run script
- generate CSV
- publish report

STEP 8:

After pipeline finishes:

Pipelines -> Runs

Open latest run.

STEP 9:

Go to: Artifacts

Download: ExpenseReport

Inside you will get: monthly_summary.csv

NOTE:

To run every Sunday, use

cron: "0 0 * * 0"

To run every first day of the month, use

cron: "0 0 1 * *"
